- **Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- **Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

Species					Population in the site				Motivation					
Group	CODE	Scientific Name	S	NP	Size		Unit	Cat.	Species Annex		Other categories			
					Min	Max		C R V P	IV	V	A	B	C	D
R		Anguis fragilis						P					X	
A		Bufo bufo						P					X	
M		Capreolus capreolus						P					X	
M	1363	Felis silvestris						P	X					

R	5670	Hierophis viridiflavus						P						X	
M	1344	Hystrix cristata						P	X						
R	5179	Lacerta bilineata						P						X	
M		Lepus europaeus / corsicanus						P						X	
M		Martes foina						P						X	
M		Meles meles						P						X	
M	1358	Mustela putorius						P		X					
M	2016	Pipistrellus kuhlii						P	X						
M	1309	Pipistrellus pipistrellus						P	X						
R	1256	Podarcis muralis						P	X						
I		Polyommatus dolus						P							X
A		Rana bergeri / Rana klepton hispanica						P						X	
A		Speleomantes italicus						P	X						
A		Triturus vulgaris						P						X	
R		Vipera aspis						P						X	

- **Group:** A = Amphibians, B = Birds, F = Fish, Fu = Fungi, I = Invertebrates, L = Lichens, M = Mammals, P = Plants, R = Reptiles
- **CODE:** for Birds, Annex IV and V species the code as provided in the reference portal should be used in addition to the scientific name
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Unit:** i = individuals, p = pairs or other units according to the standard list of population units and codes in accordance with Article 12 and 17 reporting, (see [reference portal](#))
- **Cat.:** Abundance categories: C = common, R = rare, V = very rare, P = present
- **Motivation categories:** **IV, V:** Annex Species (Habitats Directive), **A:** National Red List data; **B:** Endemics; **C:** International Conventions; **D:** other reasons

4. SITE DESCRIPTION

4.1 General site character

N18	5.0
Total Habitat Cover	100

Other Site Characteristics

Situata nel settore nord-orientale dell'Umbria ed a nord-est dell'abitato di Sigillo, quest'area è racchiusa in una delle numerose vallecole che incidono il versante sud-occidentale del massiccio di Monte Cucco. L'area, che rientra nel bacino del Chiascio e, quindi, in quello del Tevere, è solcata dal Torrente delle Gorghe che, avendo inciso profondamente una muraglia naturale di calcare, ha originato una gola stretta e profonda di notevole suggestione paesaggistica con interessanti forme di erosione quali archi rocciosi naturali. Oltre agli habitat segnalati con codice attribuiti a: Prunetalia spinosae (5130), Asperulo purpureae-Brometum erecti (6210) e Saxifraga australis- Trisetetum bertolonii (8213) ed a cespuglieti di Laurus nobilis (5230), sono presenti boschi cedui di Ostrya carpinifolia, dell'associazione Scutellario-Ostryetum, e limitati popolamenti arbustivi a Quercus ilex.

4.2 Quality and importance

Il valore di questo sito è dato dai caratteristici affioramenti a muraglia di calcare rupestre, dove si sviluppa un'interessante vegetazione casmofitica ed arbustiva, con popolamenti di Laurus nobilis. Laurus nobilis è stato indicato poichè di particolare interesse fitogeografico. L'aspetto geomorfologico e vegetazionale di questo sito è unico nell'Appennino-umbro-marchigiano. Tra la fauna è stata segnalata anche Rana graeca (specie vulnerabile), Buteo buteo, Sitta europaea e Tichodroma muraria (specie poco comuni), Martes martes (specie molto rara).

4.3 Threats, pressures and activities with impacts on the site

4.4 Ownership (optional)

Type		[%]
Public	National/Federal	0
	State/Province	0
	Local/Municipal	0
	Any Public	100
Joint or Co-Ownership		0
Private		0
Unknown		0
sum		100
