1.7 Site indication and designation / classification dates

Date site classified as SPA:	1996-09
National legal reference of SPA designation	LEGGE REGIONALE 24 marzo 2000 , n. 27Pubblicazione: Bollettino Ufficiale n. S. str. n. 31 del 31/05/2000Norme per la pianificazione urbanistica territoriale.
Date site proposed as SCI:	2006-07
Date site confirmed as SCI:	No data
Date site designated as SAC:	2017-02
National legal reference of SAC designation:	DM 03/02/2017 - G.U. 46 del 24-02-2017

2. SITE LOCATION

2.1 Site-centre location [decimal degrees]:

Longitude 13.140833
Latitude 42.788056

- **Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- **Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

Species					Population in the site				Motivation					
Group	CODE	Scientific Name	S	NP	Size		Unit	Cat.	Species Annex		Other categories

Other Site Characteristics

Complesso montuoso calcareo che comprende il settore più elevato dell'Appennino umbro-marchigiano e due vasti sistemi di piani carsico-tettonici (S. Scolastica e di Castelluccio di Norcia). La copertura vegetale dell'area a seguito delle molteplici condizioni bioclimatiche e geomorfologiche comprende più tipi di vegetazione: montana (boschi di *Fagus sylvatica*, e pascoli a *Bromus erectus*); alto-appenninica (praterie a *Sesleria apennina*, pareti rocciose, brecciai a *Drypis spinosa*) e degli ambienti umidi ed acquatici (cariceti, prati umidi a *Ranunculus velutinus*, vegetazione idrofitica).

4.2 Quality and importance

Area di eccezionale valore naturalistico ed ambientale. L'importanza risiede nel complesso floristico-vegetazionale delle sue coperture che, ricordiamo, sono rappresentate da circa 15 diversi habitat. Importantissimo e meritevole di tutta la tutela possibile è anche il patrimonio faunistico, come pure l'intero contesto ambientale che, in linea generale, ben sopporta il contenuto impatto antropico operato sul suo territorio. Tra la fauna segnalata si ricorda: *Agrypnia varia* (Tricotteri), specie rara; *Buteo buteo*, specie poco comune; *Capreolus capreolus*, reintrodotta, ma importante per la catena alimentare del lupo; *Cettia cetti*, specie stenotopa indicatore di qualità della vegetazione ripariale; *Charadrius morinellus*, poco comune; *Dama dama*, introdotto, ma importante per la catena alimentare del lupo; *Grammotaulis nigropunctatus* (Tricotteri), specie stenotopa di acque astatiche; *Hypocamptus brehmi* (Crostacei), specie rara; *Lepus europaeus*, importante per la catena alimentare dell'aquila reale; *Maculinea arion* (Lepidotteri), specie vulnerabile; *Matres martes*, specie molto rara; *Mixodiaptomus lilljeborgi* (Crostacei), rara, stenotopa di acque astatiche; *Mustela putorius*, specie vulnerabile e rara; *Neomys fodiens*, specie molto rara e stenotopa; *Oxychilus clarus* (Molluschi), poco comune; *Rana graeca*, specie vulnerabile; *Speleomantes italicus*, stenotopa e vulnerabile; *Sus scopa*, importante per la catena alimentare del lupo; *Tanymastix stagnalis* (Crostacei), stenotopa di acque astatiche; *Adicella cremisa* (Tricotteri), specie stenotopa di prati marcitoi.
