- **Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

Other Site Characteristics

Stretta vallata calcarea con pendici acclivi e, per piccoli tratti, rupestri, dove oltre agli habitat segnalati con codice ed attribuiti all'Asperulo purpureae-Brometum erecti e Brizo mediae-Brometum erecti (6210); al Potentillion caulescentis (8213), si rinven-gono: pascoli aridi a Sesleria nitida, riferiti al Seslerio nitidae-Brometum erecti; boschi di Ostrya carpinifolia, dell'associazione Scutellario-Ostryetum e faggete inquadrate nel Polysticho-Fagetum.

4.2 Quality and importance

Vallata con bassa antropizzazione, che si caratterizza per comprendere un significativo modello di paesaggio e di tipi vegetazionali caratteristici delle aree collinari e basso-montane dell'Appennino calcareo umbro-marchigiano. Sono presenti boschi di Ostrya carpinifolia e boschi a Fagus sylvatica i quali, nell'insieme, rivestono entrambe le pendici vallive, interrotti solo da piccole pareti rocciose e, verso l'alto da cenosi pascolive appartenenti a diverse associazioni, che contribuiscono a rendere piuttosto elevata la biodiversità del sito. Di particolare rilievo floristico è la presenza di Primula auricola, specie rara a livello regionale. Tra la fauna si segnala Rana graeca (specie vulnerabile), Accipiter nisus (specie rara), Buteo buteo, Falco tinnunculus e Tichodroma muraria (specie poco comuni), Lepus europaeus ( elemento fondamentale per la catena alimentare dell'aquila reale), Martes martes (molto rara),
