1.1 Type	1.2 Site code	Back to top
B	IT5210073	

1.3 Site name

Alto Bacino del Torrente Lama

1.4 First Compilation date	1.5 Update date
1996-11	2023-12

1.6 Respondent:

Name	Regione Umbria Direzione Agricoltura e Foreste Servizio XI Promozione e Valorizzazione Sistemi Naturalistici e
/Organisation:	Paesaggistici
Address:	Via M. Angeloni - 06124 Perugia
Email:	

1.7 Site indication and designation / classification dates

Date site classified as SPA:	0000-00
National legal reference of SPA designation	No data
Date site proposed as SCI:	1996-11
Date site confirmed as SCI:	No data
Date site designated as SAC:	2014-08
National legal reference of SAC designation:	DM 07/08/2014 - G.U. 194 del 22-08-2014

2. SITE LOCATION

2.1 Site-centre location [decimal degrees]:

Longitude 12.266667
Latitude 43.566667

- **Group:** A = Amphibians, B = Birds, F = Fish, Fu = Fungi, I = Invertebrates, L = Lichens, M = Mammals, P = Plants, R = Reptiles
- **CODE:** for Birds, Annex IV and V species the code as provided in the reference portal should be used in addition to the scientific name
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Unit:** i = individuals, p = pairs or other units according to the standard list of population units and codes in accordance with Article 12 and 17 reporting, (see [reference portal](#))
- **Cat.:** Abundance categories: C = common, R = rare, V = very rare, P = present
- **Motivation categories:** **IV, V:** Annex Species (Habitats Directive), **A:** National Red List data; **B:** Endemics; **C:** International Conventions; **D:** other reasons

4. SITE DESCRIPTION

4.1 General site character

N09	10.0
N23	1.0
N08	20.0

N16	61.0
N06	1.0
Total Habitat Cover	100

Other Site Characteristics

Complesso prevalentemente collinare, di natura marnoso-arenacea, con morfologia molto aspra caratterizzata da versanti scoscesi, spesso semirupestri, e vallate strette e tortuose. Esso si presenta in gran parte coperto da boschi cedui e boscaglie per lo più costituiti da cerro (*Quercus cerris*) che, a seconda dell'esposizione dei versanti, si associa con il carpino nero (*Ostrya carpinifolia*) o con la roverella (*Quercus pubescens*). Solo sui versanti più elevati, con minore pendenza o pianeggianti, tali formazioni, inquadrabili nell'ordine Quercetalia pubescenti-petraeae, vengono sostituite da boschi puri di cerro o da piccoli nuclei di faggio (*Fagus sylvatica*), dell'ordine Fagetalia sylvaticae. Ai boschi si alternano estesi arbusteti a ginepri (*Juniperus communis* e *Juniperus oxycedrus*) e vaste aree calanchive con vegetazione camefitica riferibile all'associazione Coronillo minimae-Astragaletum monspessulani, dell'alleanza Xerobromion.

4.2 Quality and importance

Nonostante la presenza di diversi elementi di pressione antropica, in particolare l'utilizzazione del bosco, si rileva un elevato interesse naturalistico per la presenza di specie rare e/o localizzate.

4.3 Threats, pressures and activities with impacts on the site

4.4 Ownership (optional)

Type		[%]
Public	National/Federal	0
	State/Province	0
	Local/Municipal	0
	Any Public	2
Joint or Co-Ownership		0
Private		98
