2.2 Area [ha]:

5357.0

2.3 Marine area [%]

0.0

2.4 Sitelength [km]:

0.0

2.5 Administrative region code and name

NUTS level 2 code	Region Name
ITE2	Umbria

2.6 Biogeographical Region(s)

Mediterranean (100.0 %)

3. ECOLOGICAL INFORMATION

[Back to top](#)

3.1 Habitat types present on the site and assessment for them

Annex I Habitat types						Site assessment			
Code	PF	NP	Cover [ha]	Cave [number]	Data quality	A B C D	A B C		
						Representativity	Relative Surface	Conservation	Global
4060			5.36			B	C	B	B
5130			374.99			A	C	B	A
6110			5.36			D			
6210			2410.65			A	C	A	A
91L0			267.85			B	C	A	A
9210			2732.07			A	C	A	A
9220					P	D			

- **PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.
- **NP:** in case that a habitat type no longer exists in the site enter: x (optional)
- **Cover:** decimal values can be entered
- **Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them

[illegible]

I	1087	Rosalia alpina			p				V	DD	C	B	C	B
A	1175	Salamandrina terdigitata			p				P	DD	C	B	C	C
A	1167	Triturus carnifex			p				P	DD	C	B	C	C
M	1354	Ursus arctos			p				P	DD	C	B	C	B

- **Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- **Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

Species					Population in the site				Motivation					
Group	CODE	Scientific Name	S	NP	Size		Unit	Cat.	Species Annex		Other categories

B	A304	Sylvia cantillans						P						X
B	A309	Sylvia communis						P						X
B	A228	Tachymarptis melba						P						X
B	A265	Troglodytes troglodytes						P						X
B	A283	Turdus merula						P						X
B	A285	Turdus philomelos						P						X
B	A287	Turdus viscivorus						P						X
B	A232	Upupa epops						P						X
R		Vipera aspis						P					X	
R	6091	Zamenis longissimus						P	X				X	

- **Group:** A = Amphibians, B = Birds, F = Fish, Fu = Fungi, I = Invertebrates, L = Lichens, M = Mammals, P = Plants, R = Reptiles
- **CODE:** for Birds, Annex IV and V species the code as provided in the reference portal should be used in addition to the scientific name
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Unit:** i = individuals, p = pairs or other units according to the standard list of population units and codes in accordance with Article 12 and 17 reporting, (see [reference portal](#))
- **Cat.:** Abundance categories: C = common, R = rare, V = very rare, P = present

- **Motivation categories:** **IV, V:** Annex Species (Habitats Directive), **A:** National Red List data; **B:** Endemics; **C:** International Conventions; **D:** other reasons

4. SITE DESCRIPTION

4.1 General site character

[Back to top](#)

Habitat class	% Cover
N16	40.0
N20	1.0
N23	1.0
N09	20.0
N08	8.0
N10	30.0
Total Habitat Cover	100

Other Site Characteristics

Complesso montuoso calcareo dove, oltre agli habitat segnalati con codice ed attribuiti a: Prunetalia spinosae (5130), Asperulo purpureae-Brometum erecti, Filipendulo vulgaris-Trifolietum montani, Astragalo sempervirentis-Seslerietum nitidae e Plantago holostei-Helianthemetum cani (6210), Poo violacee-Nardetum (6230), sono presenti estesi e compatti boschi di Fagus sylvatica, dell'associazione Polysticho-Fagetum ed, ai margini del sito, alcune formazioni a Quercus cerris, dell'ordine Quercetalia pubescenti-petraeae, interrotte da cespuglieti a Cytisus scoparius, dell'alleanza Pruno-Rubion ulmifolii. Nelle zone sommitali del Monte Coscerno sono, infine, presenti estesi pascoli a Sesleria apennina dell'associazione Carici humilis-Seslerietum apenninae; inoltre sul versante nord si trovano piccoli nuclei con Vaccinium myrtillus, attribuiti al Luzulo sieberi-Vaccinietum myrtillii.

4.2 Quality and importance

Si tratta del migliore esempio di ambiente montano presente in Umbria, al di fuori del Gruppo dei Sibillini, poichè i tipi di vegetazione montana dell'Appennino centrale sono rappresentati nel modo migliore e completo. Spiccano per la grande estensione: le faggete (generalmente ben conservate e con ampie zone governate a fustaia) ed i pascoli dei Festuco-Brometalia, che presentano aspetti floristici e fitosociologici diversi in relazione alle caratteristiche geomorfologiche del territorio. Di particolare interesse fitogeografico sono i seslereti di cresta a Sesleria apennina ed i cespuglieti a Vaccinium myrtillus tipici di ambienti alto-appenninici e qui presenti in condizioni di extrazonalità. Nella ricca flora di questi rilievi, oltre ai numerosi endemismi, sono state segnalate: Bulbocodium vernum ssp. versicolor e Gentiana lutea, rare a livello appenninico, Vaccinium myrtillus e Lonicera alpigena, rare a livello regionale. Tra la fauna è stata segnalata anche Rana graeca (specie vulnerabile), Accipiter nisus (specie rara), Buteo buteo, Falco tinnunculus e Montifringilla nivalis (specie poco comuni) Lepus europaeus (fondamentale per la catena alimentare dell'aquila reale).

4.3 Threats, pressures and activities with impacts on the site

4.4 Ownership (optional)

Type		[%]
Public	National/Federal	0
	State/Province	0
	Local/Municipal	0
	Any Public	80
Joint or Co-Ownership		0
Private		20
Unknown		0
sum		100
