- **Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- **Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

Total Habitat Cover	100

Other Site Characteristics

Settore della bassa Valnerina, che si caratterizza per la presenza di ambienti fluviali, collinari e basso-montani, contraddistinti da complessi vegetazionali tipici quali: foreste ripariali lungo le sponde del Fiume Nera; boschi di Pinus halepensis e Quercus ilex, sui versanti collinari più soleggiati; cedui di Ostrya carpinifolia, sulle pendici più elevate o esposte a nord. Tali cenosi forestali sono interrotte da aree agricole o da pascoli a Bromus erectus. Di rilievo la presenza di vegetazione pietrificante del Cratoneurion.

4.2 Quality and importance

Sito di grandissimo valore naturalistico ed ambientale per la diversità biologica animale che la caratterizza, diversità incentivata e possibile dalla interessantissima biversità di habitat vegetazionali, a loro volta ricchissimi di flore. Per la fauna si segnalano: Potamon fluviatile fluviatile, specie in rarefazione; Neomys fodiens, specie stenotopa molto rara; Buteo buteo, poco comune; Cettia cetti, specie stenotopa indicatrice delle buone qualità ambientali della vegetazione ripariale; Sitta europaea,poco comune e Tichodroma muraria, specie poco comune.
