3. ECOLOGICAL INFORMATION

3.1 Habitat types present on the site and assessment for them

- **PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.
- **NP:** in case that a habitat type no longer exists in the site enter: x (optional)
- **Cover:** decimal values can be entered
- **Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

N23	1.0
Total Habitat Cover	100

Other Site Characteristics

Rilievi collinari di natura marnoso-arenacea dove, oltre agli habitat segnalati con codice e rappresentati da cenosi del Salicion albae (92A0), sono presenti estesi boschi di Quercus cerris e Ostrya carpinifolia inquadrabili nell' associazione Aceri obtusati-Quercetum cerris interrotti da pascoli del Centaureo bracheateae-Brometum erecti e formazioni camefitiche del Coronillo emeri-Astragaletum monspessulanum. Sono, inoltre, presenti rimboschimenti a conifere.

4.2 Quality and importance

All'interno del sito sono presenti molte fitocenosi tipiche dei rilievi marnoso-arenacei, che contraddistinguono l'orografia dell'Umbria nord-occidentale. Tra le specie floristiche è stata segnalata Hymantoglossum adriaticum, rara a livello regionale, mentre per la fauna sono segnalati Potamon fluviatile fluviatile, con una popolazione regionale in rarefazione; Leuciscus cephalus, specie autoctona, importante rispetto alla banalizzazione della comunità ittica; Coronella austriaca, specie vulnerabile; Buteo buteo, Falco tinnunculus, e Sitta europaea, specie poco comuni; Mustela putorius, specie vulnerabile e rara; Lepus europaeus, specie fondamentale per la catena alimentare dell'aquila reale.

4.3 Threats, pressures and activities with impacts on the site

4.4 Ownership (optional)
